## **LED SERIES**

---

### **LED CONTROLLERS**

The LED Controllers function in either 'stand-alone' mode, or as 4-channel DMX-512 fixtures, can be controlled by any standard DMX console. Each controller can drive up to 1,000 linked RGB LED tubes per each of its 4 signal output channels, for a maximum total of 4,000 tubes per controller. (4 parallel lines) Power to the tubes is supplied by the controller the initial 4 meters of a linked run, with LED power supply units (PSU) required for each subsequent 8 meters. The LED CONTROLLER and LED PSU units are powered by AC 240V/50Hz or AC 120V/60Hz.
