LED SERIES

LED PANEL®

Entertainment *Retail *Architectural*Display

Aptly named, the LED PANEL color changing lighting panel offers unrivaled mood generation as part of an entertainment, retail/architectural or business environment, through subtle color and intensity changes and movement through fades, chases and matrixes.

Consisting of panels of various sizes, the LED PANEL Series produces a diverse range of colors and shades from its state-of-the-art LED light source.

The LED PANEL color changing lighting panel has been configured to offer total creative flexibility for professional lighting designers and specifiers.

The super bright LEDs used in the LED PANEL offer maintenance free operation, and because LED's generate virtually no heat, LED PANEL units can be generously employed in public areas where traditional light sources are unsuited or prohibited.

The LED PANEL can be used as a stand alone color changer, as well as in multiples. The units can be floor, wall or ceiling mounted. Control, which can be DMX compatible or dedicated, is via a remote controller that allows seamless color and intensity changes as well as more dramatic chases and matrixes.

With a virtually infinite range of colors, shades and hues the LED PANEL can faithfully represent the seasons and themes being displayed. The LED PANEL shelf unit is ideal for back bar displays and with the all day, all night operation of a modern bar and restaurant venue, LED PANELs are inherently suited to this demanding environment, being virtually maintenance free. Due to the inherent technology of LED, light is confined to the panel and does not pollute the merchandise being displayed or highlighted. The LED PANEL acts purely to draw the eye to the product. Any product suddenly has that irresistible added value when enhanced by the LED PANEL.

The LED PANEL range is suitable for indoor and outdoor applications and has IP 44 rating.
