LED SERIES

Tracpod 84

Tracpod 84 model TP-84 is an LED batten for professional use. With its cutting-edge RGB color mixing technology, it's capable to generate up to 16.7 million colors for use in stage production and fixed installation. The LED batten contains ten LED modules and each can separate into four individual sections, providing total of forty pixels capable to run graphics or matrix when multiple units are used together. Tracpod 84 can be operated in stand-alone or advance control via external DMX controller.
